

# NEW XPERT CHAINSAW SAFETY FOOTWEAR

## BLACK/GREEN PROFESSIONAL CHAINSAW BOOT

Features:

**New 5 layer protection** - lightweight but fully conforms to the latest standards

**Water resistant & breathable** - full grain German cowhide (the highest quality available) provides strength with suppleness and a bellows tongue prevents sawdust and dirt from entering the boot

**Extra Grip PU/Rubber sole** - Bonded to the upper by direct injection, this sole is extremely flexible, durable and resistant to heat and chemicals. The dual layer construction absorbs shocks and the tread profile, whilst being specially designed to fit tree climbing spikes, is also ideal for groundwork.

**Wide fitting** - 200 joule steel toecap appeals to a 'wider' market and a flexible steel plate underfoot protects against sharp objects.

**Low profile speed lacing system** - Allows you to tighten the laces quickly and securely closing the boot around the foot for a perfect fit

**Arbor-flex™ comfort system** - Special inserts in the back and front of the boot allow your ankle and foot to flex naturally yet still give support.

**Cambrelle® breathable lining** - Absorbs sweat and resists abrasion. Cool in summer, warm in winter.

**Nomex® stitching** throughout - virtually indestructable; resists heat and abrasion

**Moulded scuff cap**

**Anti-static**

**Lightweight**  
approx. 1085g  
(size 9)

**Dry-sole™** full length, moisture absorbing footbed
