

Sen-Tree™

Revegetation

Browsing protection from foraging animals

Sen-Tree browsing deterrent is an innovative product developed to protect new plants against kangaroos, wallabies, rabbits, pademelons, and other browsing animals. Dual-active, three part product applied to certain seedlings to assist in the prevention/ limitation of damage by animals. It is composed of a proprietary mix of Egg product, Adhesive and Grit.

Developed and made in Australia by Arborgreen

Developed, registered and trialled in Victoria and Tasmania by Agriculture Victoria. Sen-Tree is effective and easy to use. The dual-active deterrent lasts for up to 12 weeks when used correctly. At this stage, through learned association, browsing animals source feed from elsewhere. If there is some seedling predation, the Grit component—the second active ingredient—makes the foliage unpalatable.

Distributed Australia wide
Registered for use in all states and territories of Australia by Agriculture Victoria Services (AVS)

Product Codes

/ Sen-Tree Browsing Deterrent - 15L
SENTREE-15L

- / Effective against wallabies, kangaroos and rabbits
